Knowledge **Base**

Premium Liquid

Cloud Liquid

Funky Juice

Blends Concentrates

Key Features	Low viscosity allows for easy vaporisation and provides a strong nicotine hit	A highly concentrated and viscous liquid which produces dense vapour and rich flavours	Large 50ml bottles, offering great value for money. Rich in flavour.	A large catalogue of concentrated flavours, ready to be mixed together, with or without nicotine. The flavour combinations are endless.
Ratio	70PG / 30VG (High PG content)	70VG / 30PG (High VG content) 50VG / 50PG (Balanced VG/PG content)	70VG / 30PG (High VG content)	PG-Based
Nicotine Strengths	0mg, 6mg, 12mg and 18mg	0mg, 3mg and 6mg	0mg Add Nic Shot for nicotine	0mg Add Nic Shot for nicotine
Flavour Range	6 ranges 52 flavours	17 flavours using 70VG / 30PG ratio 7 flavours using 50VG / 50PG ratio	5 flavours using 70VG / 30PG ratio	Over 100 flavour concentrates
Volume	10ml Bottle with Nozzle	10ml Bottle with Nozzle	50ml Bottle with Nozzle	30ml Pipette Bottle
Device Compatibility	Starter Kits with a coil resistance above 1.0 Ohm	70VG / 30PG Cloud Liquid Advanced Kits with a coil resistance below 1.0 Ohm  50VG / 50PG Cloud Liquid Starter & Advanced Kits with a coil resistance of 1.0 Ohm and below	Advanced Kits with a coil resistance below 1.0 Ohm	Device compatibility is dependent on the ratio of the finished mixture  If the finished mixture is high in PG, then a Starter Kit using a coil resistance above 1.0 Ohm would need to be used.  Alternatively, if the finished mixture is high in VG, an Advanced Kit with a coil resistance below 1.0 Ohm would need to be used.
